

Thule ProRide 591

The most elegant and convenient way of carrying your bike on the car roof.

The very best has got even better with the Thule 591 ProRide roof mounted cycle carrier! Its stylish aluminium frame offers greater stability and a truly smart design.

It is so simple to use having a self-adjusting frame holder which allows you to load and unload a bike in an instant, with all securing done at car roof height. Just place the bike on to the aluminium tray, lift the frame holder into place, twist the tension knob and connect the quick release wheel straps and you are ready to go. The curved shape of the tray is not only a design feature; it has a really useful purpose to make fitting as simple as possible. Simply place the front wheel on the "downhill" slope and the bike automatically rolls into position and rests against the frame holder. An added advantage of the ProRide is it self adjusts to fit the cycles down tube and because of its protective rubber coating; it cannot not damage the bike. Security is provided by two locks - one to lock the bike to the carrier and one to lock the carrier to the roof bar.

Features

- Light and elegant aluminium design.
- The frame holder and the wheeltray are designed to automatically position the bike correctly in place.
- The bike is automatically resting against the self-adjusting frame holder. Meanwhile all the securing of the bike can be done comfortably at car roof height, by tightening the turning knob using a single-handed grip.
- With quick-release wheel straps for quick and convenient loading and unloading of bikes, adjustable for different wheel sizes up to 2,5 inches, the wheels are securely fastened.
- Fits bike frames up to 100mm (oval 80x100mm, round 22-80mm)
- Can easily be fitted on either side of the car roof by moving the frame holder to the left or right side.
- This carrier is pre-assembled, no tools are required.
- Universal Quick-attachment allows mounting on various roof bars, up to 60 mm width.
- T-Track adapters (20x20mm) are included for mounting the carrier directly into the T-tracks of the roof bars.
- The maximum allowed weight per bike is 17 kg.
- Lockable – bike to bike carrier, bike carrier to load carrier.
- Locks are included in the product.
- One Key System compatible. With this accessory you can replace the locking cylinders to use one and the same key for all your Thule products.
- Fulfills the City Crash norm.
